

April 27, 2007

Dear Dr. Shim, Choong Yang,

Greetings from the people who visited you in China in the meanwhile.

This is Mr. Choi, Soo Jin, leader of the liver transplantation gathering in Korea. In this opportunity, in lieu of my members, I would like to express our great appreciation on your favor shown to us during our visit to China.

First of all, while the members of the liver transplantation gathering in Korea came to look around the Tianjin First Hospital, they all remembered the beautiful memory of their life restoration from your hospital and they were looking back upon the past with excitement. And we all had an unforgettable tour in Tianjin and Beijing that you had provided for us.

It may be a rare case that, through the medical history either in China or in Korea, the operating hospital invites the operated patients, checks with their health status and shows them the very place where the patients received the new life. However, you gladly made a great decision to take care of inviting our members to your place, for which we all thank you very much. During our visit to your hospital, all your medical crew warmly welcomed us and all the members from our side were treated with good food at the nice stay at the comfortable hotel by your hospital.

In this connection, we would like to thank your nurse Ms. Lee, Yun Keum. We know that it is very difficult to accept 250 members at one time, but Ms. Lee, Yun Keum processed all the programs and led us with pleasure. During our visit

to your hospital, you sent nurses to each of our buses to take care of our health. And we never fail to give thanks to Dr. Chung, Hong, who gave us the free medical examination, and prepared the written opinion for each person in details.

During this visit to your hospital, we all came to having more interest to your Tianjin First Hospital than ever, and we all hope that our good relations will be continuing for the time to come. From now on, more people are expected to start new life from your hospital and your hospital will also take attention to them as you did to us.

We want to tell you again that our trip to China with your hospital offered us a big pleasure that could be remembered for good. I, in lieu of the members of the liver transplantation gathering in Korea, present this letter of appreciation to you. Stay healthy and happy, as you remember the people who received the new life from your hospital. We will keep on thinking of you, your hospital and your hospitality.

Very sincerely yours,

Choi, Soo Jin

Leader of the Liver Transplantation Gathering in Korea
