

## Appendix 8

### Investigative Phone Recording on an Armed Police Officer from Jinzhou City in Liaoning Province, who Witnessed Live Organ Harvesting

Aside from exposing the graphic details the organ harvesting operation, the eyewitness disclosed additional information. He said that the Public Security Bureau of Jinzhou City had murdered numerous Falun Gong practitioners through various means of torture, and then claimed that the deaths were suicides or the result of accidents. Some Falun Gong practitioners had their brains removed after they were killed. Officials at all levels of China's political and legal systems have instigated police officers and doctors to join the network for persecuting Falun Gong practitioners. Multiple armed police officers are required to guard the operating rooms where organ harvesting surgeries are performed. These officers appear to be protecting the military doctors, but are in fact acting as informants to guarantee that no one dares to expose the crimes. The guard who became a witness for WOIPFG suffered tremendous psychological stress and mental trauma after observing a live organ harvesting surgery. He decided to speak out to expose the atrocities that have been happening all over China for more than a decade.

Witness: If I am still alive,  
help me distribute this information.

Investigator: Okay. I promise you.

Witness: If I die, find someone else  
or inquire about me... or make  
an article based on my deeds.

I am not looking for recognition,  
but to encourage  
more people to step forward like me and tell the truth.

Investigator: So, this is your purpose.

You are a great man.

Witness: I am not that great. I am also very weak.

Investigator: You have not told me the time.

Witness: April 9th, 2002.

Investigator: April 9th?

Witness: Yes, the operation started at 5 pm on April 9th.  
It lasted for three hours.

Witness: Prior to that time, we had been interrogating  
and torturing her for about a week.

She already had countless wounds on her body.

Also, [we] used electric batons to beat her.

She had already become delirious.

She didn't want to eat.

Then we forcibly fed milk into her stomach.

We pinched her nose,  
then she had to instinctively open her mouth to swallow...  
so as to stay alive.

She lost almost 15 jin [7.5 kilograms] within a week.

Then two officers came from a certain office,

possibly from the Public Safety Bureau of Liaoning Province...

Anyway, it was a very secretive office.

One of them was a military surgeon from the General Hospital of the Shenyang Military Region of the People's Liberation Army [PLA], and another was a graduate of the Second Military Medical University.

Anyway, one was older and the other younger. They sent her to an operating room of a mental hospital and did the whole process.

No anesthetics were used.

They put a knife on her chest and their hands didn't tremble at all.

If that had been me, my hands would have been trembling.

I worked in the armed police. I had used guns and had done shooting before.

I had seen a lot of dead bodies, as well,

but when I saw what those military doctors did, I was impressed by them.

Their hands were not trembling at all.

They put on their surgical masks and started cutting immediately.

At that time, we [armed policemen] were standing on guard holding guns in our hands.

Then she shouted, "Falun Dafa is great."

Investigator: When the knife touched her chest, she shouted, "Falun Dafa is good"?

Witness: She wailed and shouted "Falun Dafa is good."

She said, "You kill me, one individual.

But can you kill several hundred million of us, people who are being persecuted by you for our true belief?"

At that moment, the military surgeon hesitated.

Then he looked at me,

then at our [policemen's] superior.

Our superior nodded, then the surgeon continued ...

[Her] heart was carved out first,

then her kidneys.

When her cardiac vessels were cut by the scissors, she started twitching. It was extremely horrible.

I can imitate her scream for you.

It sounded like something was being ripped apart, and then she continued "aah...aah..." She had her mouth wide open, with both her eyes wide open. Aah... I can't do this anymore...
