

Chongqing

Southwest Hospital, Third Military Medical University

—Liver Transplantation Center

Southwest Hospital is a large-scale comprehensive "Tertiary Grade A Hospital" ¹. On May 23, 2007, the General Office of the Ministry of Health of China announced the first batch of hospitals that have been approved by the Clinical Application Committee of Human Organ Transplantation Technology of the Ministry of Health. Since then, the hospital is one of the hospitals designated for liver transplantation and kidney transplantation in the list of hospitals that have approved human organ transplantation projects. ² Prior to being officially approved to designate liver and kidney transplants, the hospital has performed various human organ transplants. The Southwest Hospital liver transplantation program started in 1996. Based on the establishment of animal transplantation techniques and methods through animal experiments, the clinical liver transplantation work was started in May 1999. In 2001, it was established as the Key Laboratory of Liver Transplantation of the Chinese People's Liberation Army, and in 2004 the Southwest Hepatobiliary Surgery Hospital-University of Pittsburgh Starzl Transplant Institute International Cooperative Liver Transplantation Center. From February 1999 to February 2007, 407 orthotopic liver transplantations were completed⁴. From January 2000 to January 2003, 102 cadaver kidney transplants were performed in this hospital ⁵. By 2001, one case of combined heart and kidney transplantation was completed. As of 2002, 3 heart transplants have been completed⁷. Department of Ophthalmology, Southwest Hospital, Third Military Medical University, 1998 The Third Military Medical University Eye Bank was established—the first eye bank in the army to meet national standards, and corneal transplantation was carried out ⁸. The Southwest Medical Liver Transplantation Center relies on the Southwest Hepatobiliary Surgery Hospital of the People's Liberation Army and the Army's Hepatobiliary Surgery Institute. As of April 2011, more than 500 liver transplants have been completed⁹.

First name: Han Benli

Sex: Male

Year of birth:

Title: Professor and Chief Physician of the Army Hepatobiliary Surgery Institute ¹⁰ Office (Department): Department of Hepatobiliary Surgery, Southwest Hospital, Third Military Medical University

Brief Calendar: Graduated from Peking Union Medical College in 1957. Third Military Medical University Heilan Institute of Hepatobiliary Surgery, Southwest Hospital, Resident, Attending Physician, Lecturer, Associate Professor, Professor, Chief Physician, Doctoral Supervisor, Deputy Director, Section Chief, etc.

Number of organ transplants completed:

Papers published:

Expertise: Rich experience and profound knowledge in clinical and experimental research such as organ transplantation ¹¹. Remarks:

First name: Yang Zhanyu

Sex: Male

Date of Birth: Title: Chief Physician, Professor of Surgery, Doctor of Medicine. He is currently the deputy director of the Institute of Hepatobiliary Surgery of the Southwest Hospital of the Third Military Medical University and the deputy director of the Southwest Hepatobiliary Surgery Hospital of the People's Liberation Army. Member of the Organ Transplantation Professional Committee of the Chinese Medical Association, Chongqing

Deputy Chief Member of the Official Transplantation Professional Committee, Member of the Army Organ Transplantation Professional Committee, and Editorial Board member of Transplant Magazine.

Office (Department): Hepatobiliary Surgery, Southwest Hospital

Brief calendar: He has been engaged in clinical work of hepatobiliary surgery for more than 20 years and has accumulated rich clinical work experience. He started to work on basic and clinical research of liver transplantation in 1999. It can independently perform surgical techniques related to liver transplantation including donor liver cutting and trimming, partial liver transplantation for children, whole liver or partial liver transplantation (living liver transplantation, split liver transplantation). In the perioperative management of liver transplantation, he is good at the treatment of complications such as renal insufficiency and infection after liver transplantation, immunosuppressive therapy after liver transplantation, differential diagnosis and treatment of acute rejection, and hepatitis B virus-related liver disease after liver transplantation Prevention and treatment of HBV reinfection, etc.¹². Number of organ transplants completed: From February 1999 to February 2007, participated in the implementation of 407 orthotopic liver transplantations and donor liver removal¹³. As of 2005, 13 cases of rapid liver resection were implemented in Huanghe Hospital of Guiyang Medical College. As of 2006, participating in the liver and kidney combined rapid method of liver and kidney extraction of 16 cases of liver and kidney 15 implemented in the affiliated hospital of Zunyi Medical College. From February 1999 to January 2001, 21 cases of liver transplantation and liver extraction 16 were performed.

Papers published:

Expertise: perioperative management of liver transplantation ¹⁷. Remarks:

Nephrology

In the field of organ transplantation, kidney transplantation is carried out for high-risk patients. In terms of combined large organ transplantation, new technologies have been developed, such as combined heart and kidney transplantation, combined liver and kidney transplantation, mitral valve replacement combined with kidney transplantation, and pancreas, kidney and duodenum. Co-transplantation, etc. 60. From January 2000 to January 2003, 102 cadaveric kidney transplants were performed in this hospital.

From March 2006 to July 2007, 38 patients with allogeneic kidney transplantation were performed in this hospital⁶².

First name: Wu Xiongfei

Sex: Male

Date of Birth: October 1961 Title: Chief Physician, Professor, Chief of Section, Doctoral Supervisor. Member of Nephrology Transplantation Group, Organ Transplantation Branch of Chinese Medical Association, Member of Chongqing Organ Transplantation Professional Committee. Member and Secretary of Chongqing Organ Transplantation Professional Committee. Chinese Journal of Organ Transplantation, Kidney

Special Editor of the Journal of Disease and Dialysis Kidney Transplantation 63.

Office (Department): Department of Nephrology, Southwest Hospital

Brief Calendar: In July 1983, he graduated from the Department of Medical and Military Medicine of the Third Military Medical University. He served as Southwestern Medical Doctor in November 1998

In the field of organ transplantation, kidney transplantation is carried out for high-risk patients. In terms of combined large organ transplantation, new technologies have been developed, such as

combined heart and kidney transplantation, combined liver and kidney transplantation, mitral valve replacement combined with kidney transplantation, and pancreas, kidney and duodenum. Co-transplantation, etc. 60. From January 2000 to January 2003, 102 cadaveric kidney transplants were performed in this hospital.

Deputy Director and Director of Nephrology of the Institute of Urology of the PLA. He is currently engaged in kidney transplantation, kidney surgery, and blood purification. He has become one of the few kidney surgery talents in China. Heart and kidney transplantation, pancreas and kidney transplantation, liver and kidney transplantation, heart valve replacement and kidney transplantation were carried out earlier in China, especially the application of CRRT during the perioperative period of large organ transplantation. 64 Number of organ transplants completed: 1998-2008, participated in the implementation of 93 kidney transplants 65. In June 2000, participated in the implementation of 1 combined heart-kidney transplant, donor age 24 years, donor heart warm ischemia time of about 2min Donor kidney ischemic time is about 5min66.

Cardiothoracic surgery

Cardiothoracic surgery carried out China's first combined heart and kidney transplantation ⁹².

First name: Yang Kang

Sex: Male

Year of Birth: January 1964 Title: Chief Physician, Professor, Director of Department Section:

Institution (Department): Cardiothoracic Surgery, Southwest Hospital

Brief history: I went to the Berlin Heart Center for further training and visited the international New developments. He presided over the first case of microwave radiofrequency treatment of lung cancer in China and the first case of combined heart and kidney transplantation. He was admitted to the Department of Military Medicine of the Third Military Medical University in 1980 and a postgraduate of the Second Medical University in 1988, where he was engaged in organ transplantation research. In 1996, he was admitted to the Fourth Military Medical University for a doctorate with excellent results. Number of organ transplants completed: The first microwave radiofrequency treatment of lung cancer in China was completed under local anesthesia for the first time.

It became the first combined heart-kidney transplant operation in China and set a domestic record of completing two orthotopic heart transplant operations on the same day.

Paper published: As of 2002, participated in the implementation of 3 cases of heart transplantation and donor excision 93. On June 26, 2000, participated in the implementation of combined heart and kidney transplantation in 1 case, male donor, 28 years old, brain dead patients after traumatic brain injury, heat deficiency The blood time was 2min20s94.

Department of Anesthesiology

First name: Lu Kaizhi

Sex: Male

Year of Birth: January 1965 Position: Deputy Chief Physician, Associate Professor. Director, Department of Surgical Anesthesiology, Southwest Hospital, Third Military Medical University, Doctor, Party Secretary. Office (Department): Department of Anesthesiology, Southwest Hospital

Resume: 1981 was admitted to the Department of Military Medicine, Third Military Medical University (five-year undergraduate program), graduated with a bachelor's degree in medicine in 1986, and has served as deputy director, associate professor, and deputy chief physician of the Department of Surgery and Anesthesiology, Southwest Hospital, Third Military Medical University. party branch secretary. He studied at the Heart Center in Berlin, Germany in 2003. He is mainly engaged in the research on the pathophysiological changes of cardiopulmonary bypass and organ transplantation during perioperative period. He has deeper intentions in liver transplantation anesthesia and perioperative coagulation changes. He has performed cardiopulmonary bypass surgery for many years, which has made great contributions to improving the anesthesia safety of cardiopulmonary bypass surgery. He has also hosted many cases of difficult anesthesia such as liver transplantation and heart transplantation, and is especially good at handling critical patients.

Number of organ transplants completed: From 1998 to 2003, 137 were involved in the implementation of 60 liver transplants. Papers published:

Expertise: difficult anesthesia treatment such as liver transplantation, heart transplantation 138.

Remarks:

First name: Tao Guocai

Sex: Male

Year of Birth: May 1961 Title: Chief Physician, Professor Positioning Institution (Department):
Department of Anesthesiology, Southwest Hospital

Number of completed organ transplants: In recent years, he has been mainly engaged in the research of pathophysiological changes during the perioperative period of organ transplantation, and has a deeper purpose in anesthesiology of liver transplantation and changes in coagulation function during the perioperative period. He has presided over more than 300 cases of liver transplantation, 3 cases of heart transplantation, and combined heart and kidney transplantation, pancreas and kidney transplantation.

Anesthesia treatment 139.

Paper Publication: Expertise: Remarks:

First name: Wu Jun

Sex: Male

Date of Birth: Title: Chief Physician, Professor, Chief of Section. Director and researcher of Burn Research Institute, First Affiliated Hospital of Third Military Medical University.

Office (Department): Department of Burns, Southwest Hospital

Brief Calendar:

Number of organ transplants completed: From January 1999 to March 2000, 140 kidney transplants were performed. Papers published:

Expertise: Highly accomplished in the field of organ transplantation immune tolerance 141.

Remarks:
